Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE (1) MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Office Action

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, 5-9, 11-17, and 37-43, drawn to a method in a browser for providing an audibly controlled user interface for a limited communication device, classified in **class 709, subclass 218**.
 - II. Claims 18, 2-24, 26-34, and 36, drawn to a method in a server for providing an audibly controlled user interface for requesting call services over a network, classified in **class 709, subclass 229**.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II are disclosed as different combinations which are not connected in design, operation or effect. These combinations are independent if it can be shown that (1) they are not disclosed as capable of use together, (2) they have different modes of operation, (3) they have different functions, or (4) they have different effects (MPEP 806.04, MPEP 808.01).
3. In the instant case, invention I has separate utility such as a method in a browser for providing an audibly controlled user interface for a limited communication

Art Unit: 2144

device, classified in a *different Class/ Subclass*. Invention II has separate utility such as a method in a server for providing an audibly controlled user interface for requesting call services over a network, classified in a *different Class/Subclass*. See MPEP § 806.05(d).

4. The inventions are distinct for reasons given above, and the search required for each Group is different and not co-extensive for examination purposes. For example, the searches for the three inventions would not be co-extensive because these Groups would require different searches on PTO's classification class and subclass as following:

The Group I search (claims 1-3, 5-9, 11-17, and 37-43) would require use of search **Class 709, subclass 218** (not require for invention II).

The Group II search (claims 18, 2-24, 26-34, and 36) would require use of search **Class 709, subclass 229** (not require for the invention I).

5. For the reasons given above restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 2144

8. Applicant is reminded that the required for response to this requirement is 30 days, not one month.
